GitHub: github.com/aryanishan

Email: myteam034221@gmail.com

Mobile: +91 9555886922

SKILLS

Languages:	Python, C++, JavaScript, TypeScript, C, Kotlin, Java
Backend & Frameworks:	NodeJS, ReactJS, ExpressJS, Fast API, Rest APIs, WebSockets, Scikit-learn, Jetpack Compose
Core CS:	Data Structure, Algorithms, OOP, System Design, Computer Network, Operating System, DBMS
Databases:	MySQL, MongoDB, PostgreSQL
Tools/Platforms:	Git/GitHub, MySQL, PowerBI, Docker, Linux
Soft Skills:	Problem-Solving, Adaptability, Rapid learning, User-Centric thinking, Collaboration

PROJECTS

Creator Connect App GitHub	Feb' 26
- Built a scalable platform enabling small content creators to connect, collaborate, and grow, using a microservices architecture to handle user profiles, matching, and interactions independently. - Developed secure backend services for authentication, creator matching, and data management, ensuring efficient communication between services and smooth user experience. - Integrated a payment system to support monetization features such as premium access or collaboration tools, with reliable transaction handling and backend validation. Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js, REST APIs, Payment Gateway Integration	
Travel Companion App GitHub	Feb' 26
- Developed a platform that matches travelers based on destination, schedule, and preferences, enabling safer and more social travel experiences. - Implemented intelligent user matching and group formation features to help users find compatible travel partners and plan trips collaboratively. - Designed a scalable and modular system architecture to support future enhancements like guide booking, payments, and recommendation systems. Tech Stack: React, TypeScript, Tailwind CSS, Node.js, Express.js, REST APIs	
Spam SMS Detector GitHub	Jun' 25
- Trained an NLP-based machine learning model (TF-IDF + Naive Bayes) to classify SMS messages as spam or ham with high accuracy. - Built a Flask API to serve real-time predictions using the exported model. - Determines whether the received message is spam or not. Tech Stack: Python, Scikit-learn, Flask (or Fast API), NLP (TF-IDF, Naive Bayes), HTML, CSS, JavaScript.	

TRAINING

Lovely Professional University (Skill development)	Jun' 25– Jul' 25
Data Science course	
- Designed interactive Power BI dashboards using DAX, data modeling, and real business datasets—transforming raw data into clear decision-ready visual reports. - Built end-to-end ML pipelines (data cleaning → feature engineering → model training → performance evaluation) in Python using scikit-learn. - Applied MySQL and Excel for structured data management—writing complex JOIN queries, using pivot tables, VLOOKUPs, and automating reports.	

CERTIFICATES

Build Generative AI apps and Solution Infosys	Aug' 25
Master Generative AI and Generative AI tools Infosys	Aug' 25
Fundamentals of Network Communication Coursera	Oct' 24

ACHIEVEMENTS

- Solved 700+ coding problems across LeetCode, sharpening problem-solving skills.
- Participated in Code-A-Haunt 24hrs Hackathon.

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology	Aug' 23 – Present
Computer Science and Engineering; CGPA: 6.45	
New Stepping Stones International School	Kanpur, Uttar Pradesh
PCM Intermediate	Mar' 22 – May' 23
Percentage: 60.2	
New Stepping Stones International School	Kanpur, Uttar Pradesh
Matriculation	Mar' 20 – May' 21
Percentage: 84.8
